

## KTV SELF-REGULATING HEATING CABLE

nVent RAYCHEM KTV self-regulating trace heating cables are mainly used for process temperature maintenance of pipes/vessels that require steam cleaning, up to 300 °F/150 °C. Also used for freeze protection of systems with high heat losses. They withstand intermittent exposure to 482 °F/250 °C. The fluoropolymer outer jacket (-CT) provides high chemical resistance against aggressive organics and corrosives.

## **FEATURES & BENEFITS**

Simplified design in hazardous area: unconditional T2C class, T3-T6 based on systems approach

Longer circuit lengths due to larger cross section conductors

High power output for higher temperature applications

Fast installation: cut-to-length, flexible and easy to strip, multiple overlaps allowed, meter markings, user-friendly connections kits

Safe and efficient in operation: no overheating, uniform pipe temperatures, energy saving technology

Reliable during long life: 10 year product warranty available, maintenance free
