Ty-Rap®

Fastening solutions

Easily bundle, secure and manage your cables

First developed to solve the problem of bundling the miles of wiring found inside commercial aircrafts, Ty-Rap® cable ties can now be found virtually everywhere – from high performance racing engines to backyard tool sheds. Self-fastening and extremely durable in demanding applications, the ground-breaking design of the Ty-Rap® cable tie demonstrates how to solve a complex problem with simple technology.

Ty-Rap®

Fastening solutions, how it all started

When you choose a Ty-Rap® cable tie, you can count on quality, longevity, performance and innovation to make your work easier

First developed to solve the problem of bundling the miles of wiring found inside commercial aircraft, Ty-Rap® cable ties can now be found virtually everywhere – from high performance racing engines to backyard tool sheds. Self-fastening and extremely durable in demanding applications, the ground-breaking design of the Ty-Rap® cable tie demonstrates how to solve a complex problem with simple technology.

The marine-grade stainless steel locking device inside the tie head provides proven performance for more resilience to the elements and easier installation. Ty-Rap® has a cable tie offering for the most adverse conditions: humidity, heat, cold, UV radiation, aggressive chemicals, radiation and other harsh conditions.

Engineered for labor savings and high performance, Ty-Rap® cable ties are commonly used in a variety of applications.

For the cable tie, the proverbial light bulb came on over Maurus Logan's head while touring a Boeing aircraft manufacturing facility in 1956. Aircraft wiring was a cumbersome and detailed undertaking, involving thousands of feet of wire organized on sheets of 50-foot long plywood and held in place with knotted, waxcoated, braided nylon cord. Each knot had to be pulled tight by wrapping the cord around one's finger which sometimes cut the operator's fingers until they developed thick calluses or 'hamburger hands'. Logan was convinced there had to be an easier, more forgiving, way to accomplish this critical task. For the next couple of years, Logan experimented with various tools and materials.

On June 24 1958, a patent for the longlasting, easy-to-use Ty-Rap® cable tie was issued. The rest, as they say, is history.

“My dad didn't have a lot of formal education, but he was the most ingenious person I have ever met”, said Robert Logan, Maurus' son. “He never thought the customary way of doing things was good enough and when he looked at anything, he thought about ways to improve it. The invention of the cable tie is an excellent example of how he worked.”

Robert Logan, son of Maurus Logan Ty-Rap® Inventor

Ty-Rap® high performance cable ties

Introduction

First patented in 1958 as a way to bundle wiring in airplanes, the Ty-Rap® cable tie brand remains a benchmark of excellence and innovation in wire management

ABB's broad offering of Ty-Rap® cable ties makes the task of fastening, bundling, clamping and managing wires easier and quicker for industrial applications, construction, communications, utility and OEM professionals, as well as home improvement specialists and do-it-yourself enthusiasts. When strength, aesthetics, reliability and performance are required, knowledgeable professionals turn to Ty-Rap® – the original source for cable ties and accessories.

What gives a Ty-Rap® cable tie its exceptional strength? The corrosion-resistant, non-magnetic stainless steel locking barb in its head grips tightly and allows for a completely adjustable fit. Its raised tail makes it easy to pick up, even with gloved hands. And the easy-grip tail surface makes it easy to pull tight, even in wet or cold conditions.

Engineered for high-performance, Ty-Rap® cable ties are available in standard nylon or in materials that are specially formulated to withstand the most adverse conditions, from UV exposure to extreme cold or heat. They have even been designed to withstand the rigors of space.

Ty-Rap® cable ties – The right choice when performance really matters.

ABB is a leading power and automation technology group, active in more than 100 countries with about 150,000 employees worldwide.

ABB's portfolio includes the following product lines and flagship brands:

- Wire & Cable Management – Ty-Rap® and Ty-Met® cable ties, Shrink-Kon® heat shrink, T&B Cabletray
- Cable Protection Systems – nylon & metallic incl. brands: PMA, Adaptaflex, Kopex, Harnessflex
- Low Power Connection & Control – Furse lightning & surge protection, Elastimold, Joslyn Hi-Voltage
- Emergency lighting – emergency lighting, battery systems incl. VanLien, Kaufel, Emergi-Lite brands
- Hazardous location products – DTS explosion proof light & boxes, Kopex-Ex conduits & fittings

Environmental considerations

Impact on product life

Chemical resistance

ABB Fastening Products are developed to meet the needs of a variety of demanding environments. Whether a chemical processing facility, nuclear power plant, or the wash-down in food processing, there is a range of material choices that will extend the fastener's life and avoid costly maintenance or the introduction of foreign debris.

Hot / cold resistance

No matter the installation, there is an ABB Fastening Product to meet the need. From the hot chambers in engine compartments to the extreme cold of winter, the unique design and performance of our products offer some of the broadest range of operating temperatures and lowest installation temperatures.

UV resistance

UV radiation is a formidable force that has a damaging effect on nearly everything it touches. ABB Fastening Products are formulated to withstand a variety of conditions from desert to rainforest.

Storage and installation

Impact on product performance

Moisture Resistance

Most fastening products are made with variants of nylon because nylon offers a great combination of flexibility, strength, durability and economical pricing. Nylon, like many materials, absorbs and releases moisture depending on the external relative humidity. This can have a detrimental impact on the durability of cable ties. If the moisture content gets too low, cable ties become brittle and can break during installation.

ABB Fastening Products addresses those challenges by using high grades of nylon and offers products in moisture resistant materials for easier installation and resilience in cold or dry conditions.

Storage

For best results, fastening products should be stored in the sealed packaging until used and should not be stored in direct sunlight or near a heat source. Ideal storage conditions are 23°C (73°F) and 50% relative humidity.

Installation

For best results, a compatible ABB Cable Tie Installation Tool should be used to fasten and trim cable ties. Installations must always be tested on the application to ensure proper interaction with the bundle as the type of installation and environmental conditions will vary greatly and impact performance. A properly installed cable tie will be tightened and trimmed so the tail remains flush to the cable tie head. If the tail retracts more than 1mm inside the head, the cable tie has been tightened more than recommended and may cause premature failure.

Ty-Rap® high performance cable ties

Features and benefits

When strength, aesthetics, reliability and performance are required, knowledgeable professionals turn to the original and the best source for cable ties and accessories. Ty-Rap® fastening systems include a full range of cable ties, identification ties, clamps, mounting bases, harnessing aids and installing tools.

Using Ty-Rap® fastening systems for any bundle application will improve the reliability of the installation, effectively reducing the total cost of ownership. Ty-Rap's carefully designed features will also speed installation and provide the highest level of precision, safety and comfort.

Safety and reliability

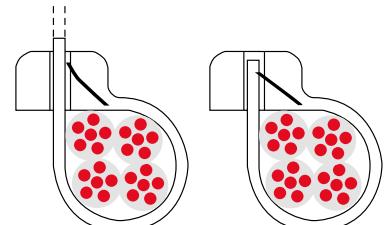

The oval head with rounded edges protects adjacent bundles and improves product life.

Up to 3X longer life

Solid body construction reduces stress points, increasing durability.

"The Grip of Steel"

Corrosion resistant marine grade stainless steel barb provides secure lock.

Protects bundle

The smooth, rounded body with molded ribs and stippling firmly grips the bundle while protecting conductors from damage.

Easy handling

The turned up tail makes orientation and handling easy, even in blind installations or tight locations.

Easy installation

The specially designed thin tail with grips makes installing the ties easy, even when wearing gloves.

Extensive range of approvals and certifications:

Germanischer Lloyd, Lloyd's Register of Shipping, VG, Mil Specification, American Bureau of Shipping (ABS); CE declaration, compliant to the low voltage directive, EN/IEC 62275, UL 62275, MS3367/3368 and EN45545.

Wide range of size combinations: several lengths up to 1143mm (45"), in 6 typical widths with a tensile strength up to 780N, to fasten cable bundles with a diameter up to 330mm (13").

Performance Installation Tools: Industry-leading tools tighten and cut the loose end of cable ties with precision for repeatable, consistent installations that leave a safe, clean edge.

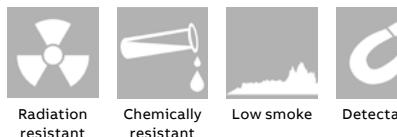

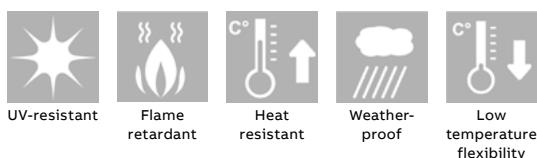

Most extensive choice of special materials:

in addition to Polyamide 6.6 (standard, UV-resistant, heat stabilized, flame retardant, heat stabilized / UV-resistant), Polyamide 4.6 (extra high temperature) and Polyamide 12, the Ty-Rap® ties are available in Polypropylene, Fluoropolymer (ECTFE), Fluoropolymer (ETFE) and the recently introduced Detectable Polyamide 6.6 and Detectable Polypropylene. UL 94 V-0, UL 94 V-2 and UL 94 HB.

Different types of packaging, including the unique "workbench boxes" for fast working without problems or losses. Recyclable packaging for a better contribution to the environment.

Outstanding range of special ties, all with the famous stainless steel locking device: ties with mounting hole or integrated peg/nail, panel mounting ties, identification ties with integrated label.

Broad range of mounting bases and accessories. Bundling the wire is just one step. ABB offers a wide range of solutions to mount the bundle to a variety of applications as well as specialty solutions for clamping and protecting wire, cable, tube and hoses.

Note: Nylon (Polyamide) is inherently susceptible to environmental conditions. Ty-Rap® cable ties are moisturized to optimum performance levels at machine-side and should be stored in cool dry areas out of direct sunlight. Cable ties are packaged in plastic bags to contain moisture and should remain sealed until ready for use.

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Natural

Characteristics

- Standard (Polyamide 6.6), to cover most indoor applications
- Several lengths and 6 typical widths with a tensile strength up to 780N, to cover the most demanding applications
- Packaging: OEM bulk quantities in recyclable polythene bags
- Also available in small bags with Euroslot (see page 12) and in workbench boxes (see page 15)

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +85°C (-76°F to 185°F)
- Min. Installation Temp.: -20°C (-4°F)
- Color: Natural
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Dimensions

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Workbench boxes

Characteristics

- An attractive packaging option for high volume manual assembly: 1000 pieces in a workbench box - easy to reach and timesaving
- This user-friendly packaging allows quicker work and easier assembly since all cable ties packed with the heads up for better access.

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range:
-60°C to +85°C (-76°F to 185°F) (natural),
-60°C to +105°C (-76°F to 221°F) (black)
- Min. Installation Temp.:
-20°C (-4°F) (natural),
-30°C (-22°F) (black)
- Color: Natural or UV-resistant black (other colors see page 12)
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free, UV-resistant (black)

Polyamide 6.6 cable ties – Colored (Stocked)

Characteristics

Ty-Rap® cable ties in Polyamide 6.6 are available in 10 different colors

- Several standard sizes and tensile strengths are normally in stock in standard pack quantities
- Standard packaging is 100/50 pieces

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +85°C (-76°F to 185°F)
- Min. Installation Temp.: -20°C (-4°F)
- Flammability rating: UL 94 V-2
- Other properties: Halogen free, Silicone free

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Impact and UV resistance + Heat stabilized

Characteristics

- Heat stabilized + UV-resistant for outdoor applications that also require a resistance to high temperature (+105°C/221°F)
- For OEM and MRO applications like: transportation, agriculture (garden/farm), construction equipment, recreational vehicles

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +105°C (-76°F to 221°F)
- Min. Installation Temp.: -40°C (-40°F)
- Color: Black
- Flammability rating: UL 94 V-2
- Other properties: UV-resistant, heat stabilized, Halogen free, Silicone free

Description of materials and properties: see pages 150 to 159

For tooling specifications: see pages 136 to 143

Tooling

ERG50
For use with 2.3mm (80N) cable ties.
See page 136.

ERG120*
For use with 2.3mm to 6.9mm (80N to 540N) cable ties. See page 136.

L-500-EU
For use with 4.8mm to 6.9mm (220N to 540N) cable ties. See page 136.

* ERG120 can not be used with TY23MX-A and TY24MX-A

Dimensions

Ty-Rap® high performance cable ties

Polyamide 4.6 cable ties – Extra high temperature

Characteristics

- Extreme continuous temperature rating:
-40°C to +150°C (-40°F to 302°F) (in air)
- For high temperature environments in industrial, OEM, MRO and commercial construction applications such as: metal processing, paper mills, lighting, automotive

Technical information

- Material - Molding: Polyamide 4.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +150°C (-40°F to 302°F)
- Min. Installation Temp.: -18°C (-0.4°F)
- Color: Light green
- Flammability rating: UL 94 V-2
- Other properties: Extra high temperature resistant, Halogen free, Silicon free

Dimensions

Ty-Rap® heat-reactive cable ties

Changes color to warn you of potentially dangerous high temperatures

Features

- Changes color from green to translucent when in contact with high-temperature surface
- Efficacy of heat-reactive polypropylene material lasts at least 24 months under normal operating conditions
- Offers all the convenience and performance benefits of standard Ty-Rap cable ties, including the Grip of Steel® type 316 stainless steel locking barb
- Available in three size options
- Choose the ERG50 or ERG120 Ty-Rap cable tie application tool for easy installation

Applications

Ty-Rap heat-reactive cable ties are ideal for use where visual indication of a hot surface helps identify an unsafe working environment or malfunctioning equipment. Tie may be secured around any surface with normal operating temperature below 40°C (104°F), including:

- Piping
- Electrical circuits
- Boiler room surfaces
- Engine compartments
- Kitchen appliances
- Other applications in which hot surfaces may be a concern

Specifications

- Material: Polypropylene
- Operating temperature: -40°C to 80°C (-40°F to 176°F)
- Heat-activation temperature: 49°C ± 3°C (120°F ± 6°F)
- Standard color: Green
- Heat-transition color: Translucent
- Color transition life: 1,000 hours above heat activation temperature
- UV resistance: Indoor use only; avoid exposure to UV light
- Tensile strength and installation:
 - 4.8mm (0.19") wide ties: 30 lbs. (135 N), ERG50 setting 2–5
 - 7.9mm (0.31") wide ties: 60 lbs., (265 N) ERG120 setting 3–6

Ty-Rap® heat-reactive cable ties

Product code	GID No.	Length L		Width W		Thickness		Loop tensile strength		Quantity [pieces]

TYHR528M-5	7TAG009600R0008	360	14.2	4.8	0.18	1.6	0.06	30	135	50

WARNING: The Ty-Rap heat-reactive cable tie is a heat indicator only. Use appropriate measuring device to verify actual temperature.

CAUTION: Replace the Ty-Rap heat-reactive cable tie upon the first occurrence of any of the following conditions: operating temperature range is exceeded, exposure to UV light, visible fading of standard green color or 24 months.

Ty-Rap® high performance cable ties

Polyamide 6.6 cable ties – Flame retardant

Characteristics

- Flame retardant. Ideal for use in locations where low flammability and low smoke are needed such as public transport, tunnels, etc.

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -20°C to +65°C (-4°F to 149°F)
- Min. Installation Temp.: -0°C (32°F)
- Color: White
- Flammability rating: UL 94 V-0
- Other properties: Halogen free, Silicone free

Fluoropolymer cable ties – ECTFE

Characteristics

- Outstanding performance of flame resistance and low smoke density when burned
- Recommended for applications where smoke generation is a concern, such as plenum areas
- Extreme resistance to UV degradation

Technical information

- Material - Molding: Fluoropolymer ECTFE
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -60°C to +160°C (-76°F to 320°F)
- Min. Installation Temp.: -60°C (-76°F)
- Color: Maroon
- Flammability rating: UL 94 V-0
- Other properties: low smoke

Dimensions

Ty-Rap® high performance cable ties

Fluoropolymer cable ties – ETFE

Characteristics

- ETFE Fluoropolymer
- Resistant to chemicals and to radiation
- No outgassing prevents contamination of sensitive areas in a vacuum, zero gravity or radioactive environments
- Typical applications include: nuclear, power plants, space industry, etc.
- Extreme resistance to UV degradation

Technical information

- Material - Molding: Fluoropolymer ETFE
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -45°C to +150°C (-49°F to 302°F)
- Min. Installation Temp.: -60°C (-76°F)
- Color: Aquamarine
- Flammability rating: UL 94 V-0
- Other properties: Silicone free, inert to most solvents and chemicals, hydrolytically stable, radiation resistant, non-outgassing

Dimensions

Ty-Rap® high performance cable ties

Nylon detectable cable ties

Characteristics

The Ty-Rap® detectable cable ties from ABB incorporate a unique compound (patent pending) detectable by X-ray equipment and metal detectors. Bright blue color enhances visual detection.

Recommended for applications in food, pharmaceutical and other contamination-sensitive industries using detection systems, where cable tie installation residuals (cut tails) are permitted in the finished product.

- Engineered to provide the highest detectability in metal detectors by size
- Specially formulated metallic particles provide high reflection in X-ray equipment
- Bright blue color for an easy visual detection
- Help achieve the HACCP EU-Directive
- Available in 6 different sizes in convenient small bags

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Bright blue
- Flammability rating: UL 94 V-2 (Polyamide 6.6)
- Other properties: Halogen free, silicone free

Description of product code structure: see page 12

Description of materials and properties: see pages 150 to 159

For tooling specifications: see pages 136 to 143

Tooling

ERG50

For use with 2.4mm to 4.8mm (50N to 220N) cable ties. See page 136.

ERG120

For use with 4.8mm to 7.0mm (180N to 540N) cable ties. See page 136.

Dimensions

Ty-Rap® high performance cable ties

Polypropylene detectable cable ties

Characteristics

The Ty-Rap® detectable cable ties from ABB incorporate a unique compound (patent pending) detectable by X-ray equipment and metal detectors and visual inspection equipment.

Recommended for applications in food, pharmaceutical and other contamination-sensitive industries using detection systems, where cable tie installation residuals (cut tails) are permitted in the finished product.

- Engineered to provide the highest detectability in metal detectors by size
- Specially formulated metallic particles provide high reflection in X-ray equipment
- Bright blue color for an easy visual detection
- Help achieve the HACCP EU-Directive
- Available in 6 different sizes in convenient small bags

Technical information

- Material - Molding: Polyamide 6.6
- Material - Locking barb: 316 grade stainless steel
- Temperature range: -40°C to +85°C (-40°F to 185°F)
- Color: Bright blue
- Flammability rating: UL 94 V-2 (Polyamide 6.6)
- Other properties: Halogen free, silicone free
